Menu A	Menu B
Option1: How could you cut a strawberry to have fair shares for two people? Draw a picture below. **Option 2:** Go strawberry picking! What math did you use? **Option 3:** Get a container of strawberries. Practice skip counting with them. (count by 2, 5, 10, 100)	**Option 1:** Holly says that 4 pounds of strawberries is the same as 64 ounces. Morgan says that it's 80 ounces. Which person is correct? How do you know? **Option 2:** Ryan is making a strawberry dessert to share with his family. He wants to triple the recipe to make sure that there is enough for everyone. If the recipe calls for ½ cup of strawberries, how much will he need to make 3 times that amount. Don't forget! Multiplication is the same as repeated addition. **Option 3:** Find a recipe that uses strawberries and make it with an adult. What math did you have to use to make the recipe?
