

fresh EATS WITH MATH

Broccoli

What is an **Estimate**?

An estimate is a good guess. It's not too high. It's not too low. It's just right!
Estimation Station! Using the picture of broccoli on the page, how many of the smaller pieces do you think would be in a full head of broccoli? Use the number line to help show your thinking.

What would be too high? _____

What would be too low? _____

What would be just right? _____

K-2 Menu

Option 1: Write or draw a story problem about broccoli.

Option 2: Go to the grocery store with your adult. How much do you think 1 head of broccoli weighs? Make an estimate. Were you close?

Option 3: Skip count with broccoli! Ask your adult to give you pieces of broccoli with a meal. Can you count them by 1's? 2's? 5's? 10's?

3-5 Menu

Option 1: Pretend that you own a broccoli farm. What math do you think you would have to use to run your farm?

Option 2: Go to the grocery store with your adult. How much does 1 head of broccoli weigh? How much would 10 heads weigh? Use multiplication.

Option 3: Find a recipe that uses broccoli and make it with your adult. What math did you have to use to make the recipe?
